## PROJECTS

---

- **NeonVerse** – Created a visually engaging text and graphics animation inspired by cyberpunk themes. Applied CSS keyframes, gradients, and multiple text-shadow layers to simulate neon lighting effects without using JavaScript. Focused on responsive design principles to ensure consistent visuals across devices.  
**Tech:** HTML, CSS
- **ExpenseTrack Pro** – Developed a Python-based personal finance tracker to record daily expenses, classify them into categories, and produce summary analytics. Implemented CSV-based data storage for portability and ease of use, and designed a text-based bar chart system to visualize spending patterns. Emphasized modular programming and file handling techniques.  
**Tech:** Python
- **Portfolio Website** – Designed and deployed a responsive portfolio website to highlight academic background, skills, and projects. Utilized semantic HTML for accessibility, CSS flexbox and grid for layout management, and JavaScript for interactive elements like smooth scrolling and dynamic navigation. Optimized for mobile-first design and cross-browser compatibility.  
**Tech:** HTML, CSS, JavaScript
